

Project Decisions

In this section, we discuss the critical decisions that have shaped our project's direction and execution. These decisions include:

- **Team Member Responsibilities:** Defining the roles and duties of each team member to ensure efficient collaboration and accountability.
- **Tech Stack Choices:** Selecting the technologies that best meet our project's needs and objectives, balancing innovation with reliability.
- **Team Communications:** Establishing communication protocols to enhance interaction and information flow among team members.
- **Ethical Decisions:** Adhering to ethical standards in all aspects of our project, from data handling to user interactions.
- **Cybersecurity Measures:** Implementing robust security practices to protect our system from cyber threats.
