

PR #37: Story/tw-103

Date	29 Apr 2024
Author	@xueshuo li
Reviewer	@Dongning Li
PR/ Branch	feat/tw-103-integrate-save-test-api
Status	APPROVED
Number of Conversations	3

Code Changes

Changes Made:

- integrate save test api, including
 - save existing test
 - save a new test
- add confirm dialog when user switch test or trying to leave the site

General Comments

- test config modal has a bug: When click confirm, pop up window wont close automatically

Specific Comments

File	Line Number	Comment	Following Action
src/tt-frontend/src/context/TestDeveloperContext.ts	null	<p>found several bugs:</p> <ul style="list-style-type: none">• When confirm in test configuration, it will not be saved, until click "save test" button. I feel it is better to save configuration when clicking "confirm"• After saving a new test, the test name in the list is NOT chosen• After saving a new test, creating another one is NOT shown as a new test content, but the previously saved test content	proceed to debug, it finally turned out to be the react useEffect dependency problem: I missed a dependency state so that when user save an existing test, save test api is not triggered

Conclusions

👉 be careful when designing useEffect dependency chain.
