

PR #2: Feature/authentication

Date	10 Apr 2024
Author	@Shulei He
Reviewer	@xueshuo li
PR/ Branch	Feature/authentication
Status	APPROVED
Number of Conversations	0

Code Changes

Changes Made:

- User Authentication - implementing user login and register features
- User Authorization - implementing permission check for Admin, Test Developer, and Marker.
- User Profile - getting user profile based on the cookie.

General Comments

- Create login/register api and setup authentication and authorization guards.
- Set up database configuration

Specific Comments

File	Line Number	Comment	Following Action
src/auth	12-15	Authentication and authorization logic(JWT, Guards, etc.)	Authentication and authorization logic(JWT, Guards, etc.)
src/database		Database Configuration	MongoDB connection configured

Conclusions

 Authentication and authorisation have been set up, should be working for the future development.
