

UI Design

 UI Lastest Update: 19 Apr 2024

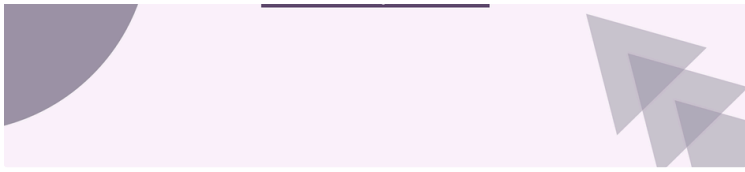

This document is used to store the UI, which stands for User Interface. It refers to the interaction between humans and machines. By experiencing UI, the client could visually understand the concepts of the project, which is efficient and easy to understand.

We keep every UI for comparison and future learning.

Version 2:

- Login Page:
 - Change Background
- Role Page:
 - Multi roles can be chosen
 - Reset password and show profile
- All Test Page:
 - Allow no-test page
 - Key + auto-generated key could be added based on requirement
 - Test configuration page including test title
- Auto-mark Page:
 - Upload test and mark
 - Show progress while marking at the backend
 - Assign marker at the same windows
