

Custom Response Format

All responses returned must follow the format specified below (in TypeScript):

```
1 export interface Response<T> {  
2   statusCode: number;  
3   message: string;  
4   data: T;  
5 }
```

Status Code

200: Success

-1: Error message (manually handled by backend)

401: Unauthorized

404: Not found

500: Internal Server Error (not manually handled by backend)

Message

This field should clearly outline a user-friendly message explaining why a request failed. If a request is successful, this message should be left `null`.

Data

Data to be rendered by the frontend.
