Code Changes

Changes Made:

- Add background figures
- Set login tittle style
- Add error message for empty or incorrect username
- Add error message for empty or incorrect password
- Add the feature to choose password visibility and invisibility
- Keep other original functionalities

General Comments

- Reduce nests, make long code more readable

Specific Comments

File	Line Number	Comment	Following Action
src/tt-frontend/src/api/page.tsx	94	this JSX is too long and deeply nested, hard to read. Consider to make it more readable	Extract some parts as independent files.

Conclusions

 Reduce nests, make long code more readable
