Code Changes

Changes Made:

- Upon clicking the "Generate Alternative Keys" button, alternative keys should be received and applied to the page

General Comments

- When clicking "Generate" button, the update need to take a while.

Specific Comments

File	Line Number	Comment	Following Action
src/tt-frontend/src/utils/http.ts	65 - 67	There is a conflict to resolve (you should keep both of them)	Resolved the conflict
src/tt-frontend/src/components/test-developer/TestContent/QuestionContent.tsx	51 - 54	Suggest to have a loading visual effect if genertating keys takes a bit of time (around 1 seconds now). It could be a spinning visual effect. You could copy a loading effect css from The Spinner CSS Loaders Collection	Added a loading button (from mUI)
src/tt-frontend/src/components/test-developer/TestContent/QuestionContent.tsx	45 - 48	I don't really get it what this useEffect is for?	To update component key, for re-rendering

✏️ Conclusions
