Code Changes

Changes Made:

- Beautify the role selection page by adding role icons and also current user details.

General Comments

- The icon material conflicts with other team members ui component.
- Need to beautify like adding hover colour.
- The code need to be refactor to make it more readable.

Specific Comments

File	Line Number	Comment	Following Action
src/tt-frontend/src/app/auth/page.tsx	All	Need to add hover colour when clicking the icons.	Hover added.
src/tt-frontend/package-lock.json	13 - 15	The origin button style changed, it might because that "fortawesome/react-fontawesome" conflicts with MUI.	Changing to use MUI instead of fontawesome.
src/tt-frontend/src/app/auth/page.tsx	All	The code need to be refactor to make it more readable.	Refactor, put all styles together and make it reusable.

✏️ Conclusions

The conflict has been resolved, the interface becomes more simplify and the structure of the code becomes clear.
